calendar

Table of Contents

The calendar is color-coded according to the track, and a legend is provided for the colors. For multi-track campuses, the tracks are listed below the date and are highlighted with color coding, when applicable.

- You cannot select a date outside the current calendar year. Valid school dates begin with the earliest meeting day for any track at the campus and end with the latest meeting day for any track at the campus.
- You can select a Saturday if Saturday is a valid attendance date, even if the course does not meet on Saturday. This may be used for bad weather makeup days.
