NOTE: If a **Table Name** is displayed, any data entered in the corresponding field will be updated in the student's TxEIS Registration pages.

Seq	This field indicates if the field is from a vertical table. • blank = a single record for the student, such as a birth date (i.e., not a vertical table). • asterisk (*) = multiple records for the student, such as multiple contact records. For example, the demo contact table has a sequence identifier for each person entered. • (iTCCS only) sequence number = a hard-coded sequence resulting in a static number of multiple-records. If there are two contacts entered, they would have sequence numbers of 01 and 02.
Updateable	This field indicates if the data in the field can be updated by a parent. This is set automatically and cannot be changed. • <i>True</i> (i.e., yes) indicates that the field can be updated by a parent. • <i>False</i> (i.e., no) indicates that the field cannot be updated by a parent.

Click under **Edit** to edit settings for a particular field.

The **Edit Field Information** section is displayed on the left side of the page.
