# **Asset Management Annual Process**

The purpose of this document is to guide you through the process of managing asset records and performing end-of-year procedures for Asset Management.

This document assumes you are familiar with the basic features of the ASCENDER Business system and have reviewed the ASCENDER Business Overview guide.

Some of the images and/or examples provided in this document are for informational purposes only and may not completely represent your LEA's process.

Asset Management Summary Quick Checklist (prints separately) - This is a one-page quick checklist of the following steps.

# Asset Record Maintenance (performed throughout the year)

### Finance

• Verify object/sub-object codes.

## Verify object/subobject codes

Finance > Tables > Asset Management Cross-Reference > Object/Subobject Codes

Verify that object/subobject codes for any assets that need to be carried over exist in the Asset Management Cross-Reference table.

If you need to add object/subobject codes to the table, the codes must exist in the Chart of Accounts.

| Tables | > Asset Managemer  | t Cross-Reference              |                    |
|--------|--------------------|--------------------------------|--------------------|
| Save   |                    |                                |                    |
| Retrie |                    | rint                           |                    |
| Delete | Object / Subobject | Object Description             | Type               |
| 1      | 6639.00            | FURNITURE & EQUIPMENT & SOFTWA | C Capital assets 🗸 |
| 1      | 6395.00            | SUPPLIES & MATERIALS-LOCALLY   | I Inventory        |
| 1      | 6399.00            | GENERAL SUPPLIES               | I Inventory        |
|        |                    |                                | + Add              |

• Extract data to Asset Management.

### **Extract data to Asset Management**

### Finance > Utilities > Extract to Asset Management

Run the Extract to Asset Management utility to extract data from Finance to Asset Management.

| Utilities > Extract to Asset Management  |  |
|--|--|
| Extract  |  |
| Create Asset Management Extract File from<br>O Current Period Check Transactions<br>Processed Check Transactions | Year 1<br>Acct Period: 9<br>Thru: 8<br>Fiscal Year: 1<br>Year 2<br>Acct Period: Thru: Fiscal Year: |

□ Under Create Asset Management Extract File from, select Processed Check Transactions to enable the Year fields and complete the Acct Period, Thru, and Fiscal Year fields for the accounting periods you want to capture.

**TIP**: The value in the **Thru** field should be the month where you last posted check transactions.

### Notes:

- The Use Asset Management Cross-Reference Table option on the District Finance Options page must be selected before assets/inventory transactions can be extracted.
- The Asset Management Cross-Reference table must have object/subobject codes for all assets/inventory before assets/inventory transactions can be extracted.

□ Click **Extract**. The Asset Management Extract report is displayed. Be sure to save or print the report.

 $\Box$  Click **Process** to begin creating the file. A message is displayed indicating that the process was successful. Click **OK**.

A dialog box is displayed with the file name (e.g., FINFA\_02212022.txt) prompting you to save the file. Be sure to make note of the file name as you will need to access it during the import process.

□ Click **Cancel** to return to the Extract Asset Management page.

### Asset Management

**CAUTION**: Prior to initiating end-of-year procedures, use the Asset Management > Utilities > Export by File ID page to perform an export of all current year data. **Do not** proceed until a valid export of all current year data exists.

If at any point during the export process, you need to restart, be sure to log out and back into Finance; otherwise, you may receive an error when trying to export data.

• (Optional) Verify automatic numbering.

## (Optional) Verify automatic numbering

Asset Management > Tables > District Asset Management Options

If you want ASCENDER to maintain and auto-assign the next available Inventory Item numbers when adding or importing new items, select **Automatic Item Numbering**.

| Tables > District Asset I | Aanagement Options     |  |
|---------------------------|------------------------|--|
| Save                      |                        |  |
| ASSET MANAGEMENT OPTI     | DNS                    |  |

• Import/add asset items from Finance.

### Import/add asset items from Finance

### Asset Management > Maintenance > Inventory Maintenance > Transaction Records

Use the file that you previously created in Finance on the Extract to Asset Management page to import asset items. Or, manually add asset items as needed.

| Maintenance > Inventory Maintenance   | Asset Man |
|---|-----------|
| Save  |           |
| Item Nbr. Retrieve Add Directory  |           |
| INVENTORY RECORDS TRANSACTION RECORDS DEPRECIATION DISTRIBUTION RECORDS BOOK RECORDS MANUFACTURER INFORMATI                       | ол        |
| Delete Account Code Account Description PO Nbr Check Nbr Trans Typ Effective Date Vendor Nbr Vendor Name Amount Reason<br>No Rows |           |
| Total: 0.00       Add   |           |
| Duplicate Import  |           |

□ Click **Import** to begin the import process.

| File FINFA_Current_02212022.txt |  |
|---------------------------------|--|
| Submit Cancel                   |  |

- $\circ\,$  Click Choose File to select the file that you created from Finance.
- Click **Submit** to import the selected file. A list of assets that can be moved from Finance is displayed.

| Enter Date Acquired to save as: (Optional) Enter Item Description to save as:  |          |                         |            | Optional) Enter Item Description to save a |                |        |                 | _           |            | +   |
|  |          |                         |            |  |                |        |                 |             |            |     |

- Select the asset to extract from Finance.
- Enter the **Date Acquired to Save As** and click **OK**. The item is now displayed on the Transaction Records tab.

□ Click **Save** to save the item. Repeat this process to continue importing the additional asset

items as only one record can be imported at a time.

For each "C" item record that is \$5,000 and over, you must complete the required fields on the Inventory Records, Depreciation Distribution Records, and Book Record tabs. You can either import all items and then return to each record and complete the fields on the various tabs **OR** complete the fields on the various tabs as you are importing each record. Either way, be sure to click **Save** after entering all data for a record to ensure that the record is updated.

□ If you have any inventory records that were not imported, you can manually enter those items so that you will have a complete inventory for closing the year. Reference the Enter Records in Asset Management guide for additional information.

- All *C Capital Assets* must have a Transaction, Inventory, Depr Distribution, and Book Record entered.
- All *I Inventory Assets* must have the Transaction and Inventory tabs completed only.
- (Optional) Generate the Campus Room Inventory Report.

# (Optional) Generate the Campus Room Inventory Report

Asset Management > Reports > Asset Management Reports > BAM1400 - Campus Room Inventory Listing

Generate and distribute the Campus Room Inventory Reports to staff so that they can verify the location and account for the various items.

It is best practice to generate the report in May prior to the end of the school year. Employees can make changes in red ink, sign the report, and then return it to the appropriate department/person allowing them to make the necessary changes in Asset Management. Possible changes may include items moving locations or being sold, broken, or deleted.

| Date Run:  |       |             | Campus Room Inv       | ventory | Report    |              |                 | Program: BAM1400 |

 Generate the Capital Assets/Inventory Listing, Auditor Analysis, and Property Class Listing Reports.

# Generate the Capital Assets/Inventory Listing, Auditor Analysis, and Property Class Listing Reports

Generate the following reports to verify data and balance totals for the year. The report totals should match.

Asset Management > Reports > Asset Management Reports > BAM1100 - Auditor Analysis Report

The ending balances should match the Auditor's totals. Always Print the Error Report with the Auditor's Analysis to review issues. Verify these items are coded correctly, if so, the errors are OK.

 $\Box$  Enter the password and click **OK**. Continue the process to save the file in the appropriate location.

□ Print the report and verify that the new items are listed for depreciation calculations **before** you process. Other Depreciation Reports are listed in Reports menu.

□ Select **Recalculate all prior years of depreciation (Also includes current FY.)** check box to recalculate the depreciation of the selected assets for all years in service. If not selected, then the depreciation is only calculated for the current fiscal year.

If necessary, you can run the depreciation calculations screen multiple times. For example, if you added an item that should have been depreciated in a previous year, you can select the recalculate option and it will retro process calculations. Be sure to keep your auditors informed about which items are involved.

If you receive an error report when you calculate the depreciations, review the report and reconcile any issues prior to continuing this process.

• Copy current file ID (C) to new file ID for historical purposes.

# Copy current file ID (C) to new file ID for historical purposes

### Asset Management > Utilities > Copy Current to New File ID

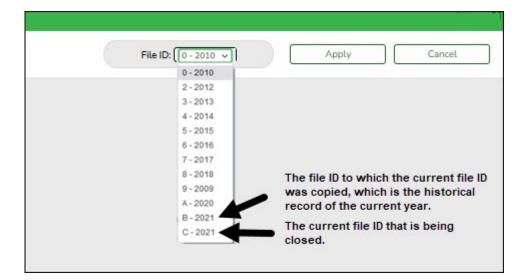

Copy the current file ID (C) data into the new historical file ID. This process allows you to copy data that currently exists in file ID C to a new file ID, which will serve as your prior year historical file.

If you need to update any information, you must log on to the new file ID through the Change File ID function and manually make the modifications.

**Note**: Changes made in one file ID do not update in the other file ID.

After copying data to the historical ID, you can begin making changes as needed to your new current file ID.

• Roll over depreciation distribution funds.

# Roll over depreciation distribution funds

### Asset Management > Utilities > Fiscal Year Processing > Depreciation Distribution Fund Rollover

This utility allows you to create new depreciation distribution records and update the fiscal year of the general ledger account codes in the depreciation distribution records. Capital asset records that are selected must meet the following criteria:

- $\circ\,$  They must exist in the current logged-on file ID.
- $\circ\,$  They must exist in the current fiscal year, as compared to the Asset Management Options table.
- They must not have been fully depreciated.
- They must not have been disposed of.

• Mass delete asset items deleted, sold, or entered in error.

# Mass delete asset items deleted, sold, or entered in error

Asset Management > Utilities > Fiscal Year Processing > Mass Delete

Mass delete all records that have status codes associated with the item being deleted, sold, or entered in error. This process will delete those records from the current year file ID; however, the items will still be available in your prior year file ID(s).

□ Review the report and click **Process**. A message is displayed prompting you to create a backup.

□ Click **Yes**. A pop-up window is displayed with the export file name.

| ile ID: C              |                       |  |
|------------------------|-----------------------|--|
| Export File Name: db00 | 1904_03042022_bam.rsf |  |
|                        |                       |  |
| Execute                | Cancel                |  |
|                        |                       |  |

 $\Box$  Click **Execute**. A message is displayed indicating that the process was completed successfully. Click **OK**.

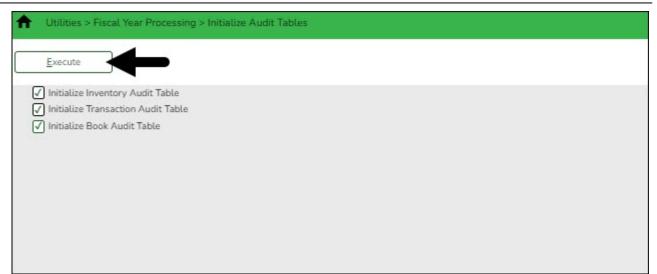

### • Initialize audit tables.

## Initialize audit tables

Asset Management > Utilities > Fiscal Year Processing > Initialize Audit Tables

This utility should be run **after** the auditor has completed their review. This process allows you to delete all selected historical audit files based on the file ID.

It is best practice to create a backup of your files prior to running this utility as this process does modify files.

□ Select all three options on the page.

□ Click **Execute**. A message is displayed prompting you to create a backup.

| $\bigcirc$ | Would you like to create | a system backup? A Backup is highly recommended. |
|------------|--------------------------|--|
|            | Yes                      | No   |

□ Click **Yes**. A pop-up window is displayed with the export file name.

| File ID: C |                       |
|------------|-----------------------|
|            | 1904_03042022_bam.rsf |
|            |                       |
|            |                       |
| Execute    | Cancel                |
|            |                       |
|            |                       |

□ Click **Execute** and save the file in the appropriate location. A message is displayed prompting you to continue with the process. Click **Yes**. A message is displayed indicating that the process was successfully completed. Click **OK**.

• Create export of file ID C.

# Create export of file ID C

Asset Management > Utilities > Export by File ID

Create an export of file ID C as a backup of the beginning new year database. Save the file and record the file name for future reference if needed (e.g., Export File ID C Beginning Year XX-XX)

This is a backup of your LEA's new year inventory without any maintenance.

After completing the above steps, you are now ready to begin the new fiscal year for Asset Management.
