ASCENDER - Finance Vendor EFT Process

The purpose of this document is to guide you through the steps in Finance to process Vendor electronic funds transfer (EFT) transactions for each vendor doing business with the local education agency (LEA).

This document assumes that you are familiar with the basic features of the ASCENDER Business System and have reviewed the [ASCENDER Business Overview guide](#).

Some of the images and/or examples provided in this document are for informational purposes only and may not completely represent your LEA's process.

Finance Vendor EFT Process

- 1. [Add/update vendor EFT email address.](#)

Add/Update Vendor EFT Email Address

[Finance](#) > [Maintenance](#) > [Vendor Information](#) > [Vendor Name/Address](#)

Add a new vendor record or update an existing record with the vendor's EFT email address. The EFT email is required for all vendors participating in electronic funds transfer (EFT) payments.

The screenshot shows the 'Vendor Information' form in the ASCENDER system. The 'Vendor' field is set to '37301'. Under the 'Vendor MISCELLANEOUS' section, the 'Vendor Number' is '37301' and 'Last Trans' is '04-12-2018'. The 'Active/Inactive' dropdown is set to 'Active'. In the 'Links' section, the 'EFT E-mail' field is highlighted with a black box and contains the text 'testem4@yahoo.com'. Other fields include 'Phone', 'Fax', 'E-mail', 'Internet', and 'Comments'.

- Under **Links**, add or update the EFT email address:

EFT E-mail	Type the vendor's email address to send the vendor EFT payment information. The field can be a maximum of 45 characters.
EFT E-Mail	Click to open a new email message using your default email provider.

Note: The vendor's EFT email address is required prior to adding the vendor's bank information on the Vendor Miscellaneous page.

Click **Save**.

2. [Add/update bank codes.](#)

Add/Update Bank Codes

[Finance > Tables > Bank Codes > Bank Codes](#)

Verify the appropriate bank codes exist. If not, add the applicable codes. A bank code is required for each bank participating in electronic funds transfer (EFT) payments. In order for a vendor to receive an EFT payment, you must indicate a specific bank for the vendor.

You can add or edit information in the bank table at any time. The bank name, address, telephone, and contact person information can be updated by accessing the bank code, changing the data, and saving the changes. If the bank code is incorrect, you must delete the incorrect code and then add the new code.

Note: Multiple vendors may use the same bank.

Click **+Add** to add a new row.

Bank Code	Type a unique user-defined bank code. If the information has already been entered for this code, it is displayed when the code is entered. The field must be three characters.
Bank Name	Type the bank name.
Route Number	Type the nine-digit routing number to use for the electronic funds transfer.
Street Nbr	Type the street address number if used.
Street Name	Type the street name.
City	Type the name of the city where the bank is located.

State	Click  to select the two-character code of the state where the bank is located.
Zip	Type the five-digit zip code for the bank's location.
Zip 4	Type the four-digit zip code if used.
Contact	Type the name of the contact person at the bank who is responsible for processing electronic funds transfers.

Click **Save**.

TIP: If you are creating a vendor record for an employee who is also participating in EFT payments in Payroll, you can use the **Copy from Payroll** functionality on the Vendor Miscellaneous tab and complete the vendor's bank information.

It is recommended that you print your bank details from the [Payroll > Tables > Bank Codes > EFT](#) tab and use it as a reference when adding your LEA's bank details on the EFT tab in Step 3. Use caution when typing your **Route** number to ensure accuracy.

2. [Add/update EFT Information.](#)

Add/Update EFT Information

[Finance](#) > [Tables](#) > [Bank Codes](#) > [EFT](#)

Create the LEA's EFT record to be used when sending vendor EFT payments to their bank. This function is accomplished by creating an EFT file during a payment run. This file is then given to the local education agency's (LEA) bank to be transmitted to an automatic clearinghouse.

Enter the EFT data for the LEA's EFT bank account to be used for Finance checks. Reference the [Payroll](#) > [Tables](#) > [Bank Codes](#) > [EFT](#) tab if using the same EFT bank.

The screenshot shows a web application interface for 'Tables > Bank Codes'. At the top, there is a green navigation bar with a home icon, the text 'Tables > Bank Codes', and a 'Finance' dropdown menu. Below the navigation bar is a 'Save' button. The main content area has two tabs: 'BANK CODES' and 'EFT', with 'EFT' being the active tab. Under the 'EFT' tab, there are 'Retrieve' and 'Print' buttons. The form contains several input fields and dropdown menus:

- Immediate Destination: 111111111
- Immediate Origin: 333333333
- Company ID Type 5: 222222222
- Originator Status Code: 1
- Originating DFI ID Code: 44444444
- Bank Code: 033 - Test Bank (dropdown)
- Company ID Type 8: 555555555
- ACH Service Class Code: 200 - Mixed debits and credits (dropdown)
- Employer Offset Account: 66666666

Field	Description
Immediate Destination	<p>Type the nine-digit Federal Reserve routing number used to identify the receiving point. This number is provided by the individual bank. The field length is ten digits, since some banks require a leading space before the nine-digit routing number. If you type the nine-digit routing number and later need to add a space before the number, you must do the following:</p> <p>Change the field to a random number (e.g., 123456789).</p> <p>Click Save.</p> <p>Add a leading space with the appropriate nine-digit routing number following the space (e.g., [space]987654321).</p> <p>Click Save again.</p> <p>Only follow these steps when you need to add a space before a number that was previously saved.</p>
Company ID Type 5	<p>Type the 10-digit code used to identify the LEA. This is either the employer identification number with a 0 added on the end of the number or a leading 1, depending on the vendor's bank.</p>

Field	Description
Originating DFI ID Code	Type the eight-digit code used to identify the originating DFI. This is the LEA's bank routing number without the last digit.
Company ID Type 8	Type the 10-digit code used to identify the LEA. This is either the employer identification number with a 0 added on the end of the number or a leading 1, depending on the vendor's bank.
Employer Offset Account	Type the offset account number used to debit the LEA's bank account. This number is the LEA's payroll bank account number and will be included in the EFT file. Leave blank to exclude debits from the EFT file.
Immediate Origin	Type the 10-digit code used to identify the EFT sending point. There is a leading space plus the routing number for the LEA's bank.
Originator Status Code	<p>Type the one-digit code used to identify the originator of the EFT tape. Valid codes for this field include the following:</p> <p>1 - Originator is an ACH association member or originating DFI, subject to ACH rules</p> <p>2 - Originator is a federal government entity or agency not subject to ACH rules</p> <p>3 - Originator is not an ACH member or originating DFI, but subject to ACH rules</p>
Bank Code	Click  to select the assigned code for the LEA's bank.
ACH Service Class Code	<p>Click  to select one of the following codes:</p> <p>200 - Mixed debits and credits - The EFT file includes 5200 and 8200 records indicating that the file could contain debit and credit amounts.</p> <p>220 - Credits only - The EFT file includes 5220 and 8220 records indicating that the file only contains credit amounts.</p>

Click **Save**.
