Set up credit card codes

[Finance > Tables > Credit Card Codes](#)

Establish a list of credit card codes to be used by the local education agency (LEA). The credit card code table is necessary to complete credit card functions in Finance, Purchasing, and District Administration.

Multiple credit cards can be set up for a credit card company. The account code must be a liability account (2XXX). A different account code can be used for each credit card to make it easier to verify transactions if the credit card statement does not reconcile to the transactions in ASCENDER. This account should be different from previously used liability accounts.

If a specific credit card code is assigned to a user, the user can select from their assigned list of active credit card codes in the **Credit Card Code** drop-down field when entering a requisition on the [Purchasing > Maintenance > Create/Modify Requisition](#) and [Create/Modify Contract Requisition](#) pages in Purchasing.

Create credit card transactions

After the above steps are completed, you can use one of the following three methods to create credit card transactions.

1. Create a requisition in Purchasing

[Purchasing > Maintenance > Create/Modify Requisition](#)

☐ Create a requisition.

- In the **Credit Card Code** field, press the SPACEBAR to view a list of credit card codes tied to your user profile. Select the appropriate credit card code.

Reminder: The vendor selected on the requisition is the vendor that is being paid with the credit card, not the credit card company.

Soft encumbrance:

162-00-4310-01-000-200000		Credit

Post the payable transaction:

[Finance > Maintenance > Credit Card > Posting - PO Tab](#)

☐ After the requisition is approved, retrieve the PO to post or create the payable transaction (credit card transaction).

- The contra account is the credit card account from the credit card table even though it is different from the purchasing fund. This means that due to/due from accounts will be created to complete the accounting transactions.

Encumbrance liquidation:

162-00-4310-00-000-200000	Debit	
162-53-6399-00-892-299000		Credit

199-00-1261-00-000-200000	Debit	
199-00-2110-01-000-200000		Credit

2. Create a PO in Finance

[Finance > Maintenance > Postings > Purchase Order](#)

Encumbrance:

162-53-6411-00-892-299000	Debit	
162-00-4310-00-000-200000		Credit

Post the payable transaction:

[Finance > Maintenance > Credit Card > Posting - PO](#)

☐ Retrieve the PO to post the payable transaction (credit card transaction). Since this transaction was created without selecting a credit card code, a message is displayed as a reminder. On this tab, a credit card transaction is entered similarly to the [Finance > Maintenance > Postings > Check Processing - PO](#) tab.

- In the **Type** field, select the type of credit card transaction (*Purchase or Return*).

- In the **Credit Card Code** field, select the credit card code for the card used.

Verify that the following fields are completed for a return:

- The **Type** field must be set to *Return*.
- The **Net Expend Amt** field must be a negative amount.
- A credit memo number must be entered in the **Credit Memo Nbr** field on this tab prior to saving the record.

In the above example, a return for \$200 to cancel a TASBO registration was created on the Finance > Maintenance > Credit Card > Posting - PA tab.

Reverse expenditure:

162-00-2177-99-000-200000	Debit
