# Administrative Guide: ASCENDER EmployeePortal Setup

ASCENDER EmployeePortal provides users with web access to various data inquiries and maintenance features.

EmployeePortal allows users to view their current and historical pay information including calendar year-to-date information, deductions, earnings, leave balances, W-2 information, and 1095 information. And, up to 18 months of check stub information; year-to-date leave earned, leave used, and leave balances (including any unprocessed transactions entered for future payrolls).

In addition, users can create, edit, delete, and submit leave requests. The EmployeePortal also provides a self-service maintenance page allowing users to submit changes to their demographic and payroll information such as changes to an address, withholding and exemption status, and direct deposit settings. Some changes may require additional approval or documentation.

This guide assumes you are familiar with the basic features of the ASCENDER Business system and have reviewed the [ASCENDER Business Overview guide](#).

## Before You Begin

Review the Getting Started document. The Getting Started document that is provided with each software release contains instructions about how the files must be configured and how to modify the properties for EmployeePortal.

EmployeePortal is driven by the settings previously defined by the LEA's administrators. These settings determine the level of access that users have in EmployeePortal.

This guide provides the necessary steps to set up the appropriate access to the portal and its various pages. These tasks are managed in the ASCENDER Business Payroll and Personnel applications.

### III. Set up Supervisor Profiles

Before an employee can be set up as a supervisor, approver, or temporary approver, the employee must have a security user profile.

1. [Create a demographic record.](#)

[Personnel](#) > [Maintenance](#) > [Staff Demo](#) > [Demographic Information](#)

Create an employee record. The record cannot be a non-employee record created in District Administration.

Add an email address to the employee record to allow the supervisor or temporary approver to receive automatic reply and workflow emails.

2. Create a security profile.

[Security Administration > Manage Users](#)

Update the user's profile with the employee number that was generated on the employee's Personnel demographic record.

If the employee has an existing user profile, ensure that the profile is active (i.e., not marked as deleted in Security Administration).

## IV. Set up the Leave Request Feature
