Admin Guide: ASCENDER EmployeePortal Setup

This guide provides the necessary steps to set up the appropriate access to ASCENDER EmployeePortal and its various pages.

ASCENDER EmployeePortal provides users with web access to various data inquiries and maintenance features.

EmployeePortal allows users to view their current and historical pay information including calendar year-to-date information, deductions, earnings, leave balances, W-2 information, and 1095 information. And, up to 18 months of check stub information; year-to-date leave earned, leave used, and leave balances (including any unprocessed transactions entered for future payrolls).

In addition, users can create, edit, delete, and submit leave and travel requests. EmployeePortal also provides a self-service maintenance page allowing users to submit changes to their demographic and payroll information such as changes to an address, withholding and exemption status, and direct deposit settings. Some changes may require additional approval or documentation.
