Export Asset Management Tables - BAM7100

Asset Management > Utilities > Export Asset Management Tables

This utility is used to export a copy of all current asset management tables prior to running major functions. When exporting asset management tables, copies of the asset management data for the logged-on file ID are exported to the archive file located at a destination that you assign.

Export asset management tables:

Field	Description
Export File Name	The export file name is displayed and has the format dbccddddd_mmddyyyyy_bam.rsfl, where cccddddd is the county-district number and mmddyyyyy is the current date.
Execute	Click to execute the process. - Click Execute to execute the process. A message is displayed indicating that you are about to export asset management tables and confirming that you want to continue. - Click Yes to continue the export. - Otherwise, click No to cancel the export. - Type a password for the exported file, and then click Execute. The File Download page is displayed. - Click Save to save the file. A Save As dialog box is displayed. - In the Save in field, click to navigate to the appropriate folder. - In the File name field, the file name is set to dbccddddd_mmddyyyyy_bam.rsfl, where cccddddd is the county-district number and mmddyyyyy is the current date. You can type a different name for the file. - Click Save. Otherwise, click Cancel to close the Save As dialog box without saving the file. The tables are exported and a message is displayed indicating that the export process completed successfully. Click OK.
