## Asset Management > Utilities > Fiscal Year Processing > Mass Delete

This utility is used to selectively drop records for capital assets, inventory items, and associated files. The records that are selected for deletion are based on the acquired date range and the status codes that are entered on the page. The user may also delete closed checkout inventory records that are no longer needed.

**Note:** The Mass Delete process modifies files, so it is recommended that you create a backup of your files before running this process.

## Mass delete capital asset and inventory records

Under **Capital Assets and Inventory**:

Field	Description
<b>Delete Capital Asset and Inventory Records</b>
