## Asset Management > Utilities > Mass Update > Inventory

This utility is used to update the inventory data for all records, only capital asset records, or only inventory asset records. Values in the drop-down list of the **From** column are derived from inventory record values. Values in the drop-down list of the **To** column are derived from the code tables.

**Note:** When multiple criteria are selected for mass update, records selected must match all criteria.

### Mass update inventory records:

Field	Description
