Merge Asset Management Text File - BAM7700

Asset Management > Utilities > Merge Asset Management Text File

This utility is used to upload Asset Management tables that were created using another type of software. All records being merged must have an item number or bar code. The item number or bar code becomes the item number for the Asset Management application inventory record. If no item number or bar code exists, the record is not added or updated in the Asset Management application.

Note: When you create the merge text file from the vendor's software, please name it UPcccddd (where cccddd is the county-district number).

[File layout](#)

Modify a record:

Under **Options:**

Field	Description
Add New Only	Selected by default. If selected, only new asset records are merged into the Asset Management application. If there is no item number or bar code for a record in the upload file, the record is not added to the Asset Management records, and the message "r;No item nbr or bar code. Not processed." is printed on the Inventory Upload Error Report. If the item number record does not already exist in the Asset Management application and it does exist in the merge text file, it is a new record to be added to the Asset Management Item Master table (GIcccddd) and the Transaction table (GTcccddd). The amount you entered in the Amount to Determine Asset Type field determines if the item number record is merged as a C type (Capital item) or an I type (Inventory item) record. If the item number record is a type C item, it is added to the Asset Management Depreciation Distribution table (GDcccddd) and the Book table (GBcccddd). The item number record information prints on the Inventory Upload Report indicating that the record was added to the Asset Management application. If the item is found in the Asset Management inventory file, this is not considered a new record, and the "r;Item XXXXXXXXXX exists. Not added." message is printed on the Inventory Upload Error Report to indicate that this record was not added to the Asset Management application.

Field	Description
Update Existing Only	<p>Select to update asset records that already exist in the Asset Management application. This allows tracking of items that have been moved from one room or campus to another.</p> <p>If there is no item number or bar code for a record in the upload file, the record is not updated in the Asset Management records, and the message "r;No item nbr or bar code. Not processed." is printed on the Inventory Upload Error Report.</p> <p>If the item number record already exists in the Asset Management application, the program updates data in the Item Master table (Glccddd) and in the depreciated cost and basis of adjustment columns of the Book table (GBccddd). A before and after image of the record is displayed on the Inventory Upload Report. This enables you to verify how the record was changed.</p> <p>If the record does not exist in the Asset Management application, the record is not updated, and the message "r;Item XXXXXXXXXX does not exist. Not updated." is printed on the Inventory Upload Error Report.</p>
Add New and Update Existing	<p>Select to merge new records and update existing records in the Asset Management application. Records are added and/or updated, and a before and after image of the record is printed on the Inventory Upload Report.</p> <p>If there is no item number or bar code for a record in the upload file, the record is not added to the Asset Management records, and the message "r;No item nbr or bar code. Not processed." is printed on the Inventory Upload Error Report.</p> <p>If the item number record does not already exist in the Asset Management application and it does exist in the merge text file, it is a new record to be added to the Asset Management Item Master table (Glccddd) and the Transaction table (GTccddd).</p> <p>The amount you entered in the Amount to Determine Asset Type field determines whether the item number record is merged as a C type (Capital item) or an I type (Inventory item) record.</p> <p>If the item number record is a type C item, it is added to the Asset Management Depreciation Distribution table (GDccddd) and the Book table (GBccddd).</p> <p>The item number record information prints on the Inventory Upload Report indicating that the record was added to the Asset Management application.</p> <p>If the item number record already exists in the Asset Management application, the program updates the data in the Item Master table (Glccddd) and in the depreciated cost and basis of adjustment columns of the Book table (GBccddd). A before and after image of the record is displayed on the Inventory Upload Report. This enables you to verify how the record was changed.</p>
Property Class	<p>Type the user-defined code that will be assigned to item records being merged. The field can be a maximum of ten characters. The code must exist in the Property Class Code table before it can be used in this field. This is a required field.</p>
Current Year for Depreciation (YYYY)	<p>Type the fiscal year in the YYYY format. This is the fiscal year (i.e., 2018 for school year 2017-2018) for which the asset depreciation is calculated.</p>
Amount to Determine Asset Type	<p>The default is set to 5,000.00, but you can type any value assigned by the district up to 999,999,999.99. The value entered determines the threshold for items to be capitalized.</p> <p>If an item is equal to or greater than this value, it is a capitalized item and is an inventory type C record in the Item Master table. An inventory record, transaction record, depreciation distribution record, and book record are created for the item.</p> <p>If an item is less than the value indicated, it is an inventory item and is an inventory type I record in the Item Master table. An inventory record and transaction record are created for the item.</p>

Default Account Code for Capital Items	Type a valid general ledger account code to assign assets. The field can be a maximum of 20 digits. The general ledger account represents the accounts from which the items were purchased, and any exceptions can be changed after the merge process is complete.
Default Acquired Date for Inventory Items	Type a default date in the MMDDYYYY format to use as an acquired date for inventory items. To not use a default date, leave the field blank.
Import Path	<p><input type="checkbox"/> Click Import to begin the import process.</p> <ul style="list-style-type: none"> Click Choose File to select the file that you created from Finance. Click Submit to import the selected file. A list of assets that can be moved from Finance is displayed. Select the asset to extract from Finance. Enter the Date Acquired to Save As and click OK. The item is now displayed on the Transaction Records tab. <input type="checkbox"/> Click Save to save the item. Repeat this process to continue importing the additional asset items as only one record can be imported at a time.
Execute	<p>Click to execute the process. When the processing is completed, the Inventory Upload report is displayed. Review the report.</p> <p>Review the report using the following buttons:</p> <p>Click  to go to the first page of the report. Click  to go back one page. Click  to go forward one page. Click  to go to the last page of the report.</p> <p>The report can be viewed and saved in various file formats.</p> <p>Click  to save and print the report in PDF format.</p> <p>Click  to save and print the report in CSV format. (This option is not available for all reports.) When a report is exported to the CSV format, the report headers may not be included.</p> <p>Click X to close the report window. Some reports may have a Close Report, Exit, or Cancel button instead.</p> <p>Click Error Report to view the Inventory Upload Error Report, which displays any errors encountered during the merge process. The Report button allows users to switch between the two reports.</p> <p>If the Inventory Upload Error Report is displayed, click Upload Report, and the Inventory Upload Report displays a listing of all assets that were uploaded.</p> <p>If the Inventory Upload Report is displayed, click Error Report, and the Inventory Upload Error Report displays a listing of all errors from the merge process or the selected parameters if there were no errors.</p>
Process	<p>Continue the process.</p> <p>Click to update the selected records in the asset management tables.</p> <p><input type="checkbox"/> Click Process to update the selected records in the asset management tables. A message is displayed prompting you to create a system backup.</p> <p>A message is displayed indicating that the process was completed successfully. Click OK.</p>
