# Distances - FIN2855

## Finance > Tables > Travel > Distances

This tab is used to maintain a list of distance records between predefined to/from travel locations. These locations are set up on the [Finance > Tables > Travel > Locations](#) tab.

If the Location Locking feature is enabled on the [Finance > Tables > District Finance Options 2](#) page, the **Mileage** (Start, Stop, and Map) fields, **Point of Origin**, and Destination fields are disabled on EmployeePortal mileage requests and employees will need to use the Locations link to select from the predefined list of locations.

This is an optional method for maintaining a list of locations.

### Retrieve a record:

Field	Description
<b>Start At Origination</b>	Type the starting location from which you want to retrieve. Or, in the <b>Destination</b> field, type the starting destination location from which you want to retrieve.

Click **Retrieve**. A list of origination/destination locations equal to and greater than the entered data is displayed.

### Add a record:

Click **+Add** to add row.

<b>Origination</b>	Click  to open the <a href="#">Location lookup</a> and select a starting location.
<b>Destination</b>	Click  to open the <a href="#">Location lookup</a> and select an ending location.
<b>Distance</b>	Type the number of miles from the <b>Origination</b> (starting) location to the <b>Destination</b> (ending) location.

Click **Save**.

### Other functions and features:

<b>Retrieve</b>	The <b>Retrieve</b> button is also used to retrieve information from the last save. If you click <b>Retrieve</b> , any unsaved changes are lost.
	Click to delete a row. The row is shaded red to indicate that it will be deleted when the record is saved.
<b>Print</b>	Click to print the list of travel locations. <a href="#">Review the report.</a>
