Finance > Tables > Travel > Locations

This tab is used to maintain a list of predefined travel locations to be used for employee travel reimbursement requests. These locations can be used on the Finance > Tables > Travel > Distances tab to define distance records for potential to/from travel locations.

If the Location Locking feature is enabled on the Finance > Tables > District Finance Options 2 page, the **Mileage** (Start, Stop, and Map) fields, **Point of Origin**, and **Destination** fields are disabled on EmployeePortal travel requests and employees will need to use the Locations link to select from the predefined list of locations/distance records.

This is an optional method for maintaining a list of locations. The Location Locking feature is not available for extended mileage travel requests.

Retrieve a record:

Field	Description
Start Location ID	Type the starting location ID from which you want to retrieve.
Location Name	Type the starting location name from which you want to retrieve.

❑ Click **Retrieve**. A list of location IDs or names equal to and greater than the entered data is displayed.

Add a record:

❑ Click **+Add** to add a row.

Location ID	Type a unique user-defined location ID. This field can be a maximum of twenty alphanumeric characters. This is a required field.
Location Name	Type a user-defined location name. This field can be a maximum of thirty-five alphanumeric characters. This is a required field.
