1099_generate_1099_report i

[Finance > Finance Reports > Vendor/Purchase Order Reports > FIN2050 - 1099 Report](#)

Generate this report to review the vendors and transactions for accuracy.

If a vendor is not displayed on the report and should be, verify the following:

- The Employer identification number (EIN) or social security number (SSN) is populated and the **1099 Eligible** field is selected on the Finance > Maintenance > Vendor Information > Vendor Name/Address tab.
- The object code used to pay the vendor exists in the object code table in both the current and prior year file IDs.

If 1099 transactions exist for objects that you do not want to be included on the 1099s, update the 1099 object codes table. If you remove a code from the Finance > Tables > 1099 Object Codes page, that object is not included on the 1099-MISC form or the 1099 file, but is still displayed on the 1099 Report without a **Payment Type** description.

Transactions can be deleted and added by running the Create 1099 Work Table utility again or manually deleting and adding transactions on the Finance > Maintenance > 1099 Record Maintenance page. If you delete a transaction from a vendor and the Create 1099 Work Table utility is processed again, delete the transaction on the Finance > Maintenance > 1099 Record Maintenance tab.

If the student activity check transactions (fund 865) are not maintained in TxEIS, you must manually enter that information on the Finance > Maintenance > 1099 Record Maintenance page.
