(Optional) Assign credit card codes to users

[District Administration](#) > [Maintenance](#) > [User Profiles](#) > [Purchasing Credit](#)

Assign specific credit card codes to individual requisition users. If users will not be selecting a credit card code when creating and submitting a requisition, then credit card codes do not need to be assigned to users. The business office can select a credit card code on the PO at the time the payable transaction is entered in Finance.

If a specific credit card code is assigned to a user, the user can select from their assigned list of active credit card codes in the **Credit Card Code** drop-down field when entering a requisition on the [Purchasing > Maintenance > Create/Modify Requisition](#) and [Create/Modify Contract Requisition](#) pages in Purchasing.

Click **+Add** to add a row. The Credit Card Directory is displayed.

- Select one or more credit card codes to assign to the selected user. Only credit card codes that exist on the [Finance > Tables > Credit Card Codes](#) tab are displayed.
- Type data in the **Search** field to narrow the list of credit card codes displayed in the list.
- Click **OK** to continue and return to the Purchasing Credit Cards tab.
- Click **Cancel** to return to the Purchasing Credit Cards tab without making a selection.

Field	Description
Credit Card Code	The user-defined credit card code is displayed.
Description	The user-defined credit card code description is displayed.
Active	Indicates the credit card code status.

Click **Save**.
