ASCENDER now interfaces with the IRS Information Returns Intake System (IRIS) system to allow authorized users to transmit information returns directly to the IRS via the Application-to-Application (A2A) transmission method. Through the A2A transmission method, users can perform the following:

- Electronic filing of information returns
- Submit transmissions directly from their application to the IRIS application
- XML Format
- Bulk filing
- Corrections and Automatic Extensions

Before beginning the IRIS process, review the IRIS introductory presentation provided by the IRS: [Information Returns Intake System \(IRIS\) IRIS 101](#) and review IRS webpage: [E-file information returns with IRIS](#).

If using Information Returns Intake System (IRIS) to file 1099s, complete the following connection information to process 1099 information returns to IRIS.

[Finance > Utilities > IRIS > Connection](#)
