If necessary, update the **New Employee** field to identify new employees. If an employee is not new, clear this field. This field indicates a new employee record and is only displayed on forecast position records. If selected, the salary simulations will budget the employer contribution for new employees even though they do not have current year payroll records.

Notes:

This field is not displayed on supplemental position records.

If the position is changed to any status other than **Active**, the field is disabled.

[Position Management > Maintenance > PMIS Position Modify > Budget](#)

If there are retirees who work in the LEA, confirm that the **TRS Status** field is set to 5 - *Retired*. If the TRS status is incorrect, there is a possibility that the status will be incorrect (TRS-eligible) when the employee is moved to the current year payroll.
