If working on the Distribution tab, you must select an account code from the autosuggest drop down in the **Account Code** field versus typing in the full account code in order to validate against the grant code table.

If necessary, use one of the following options to vacate an employee from a position:

- Option 1:** It is best practice to use the [Position Management > Utilities > Vacate Employee from Forecast Positions](#) page to vacate a position.

Typically, when an employee decides to leave the LEA at the end of the year, the employee is paid off in payroll at the end of their contract; therefore, no additional action is necessary for the current year. However, in the forecast records, the employee must be removed from all existing positions.

Click **Create Report**. The report is displayed. Use the sort/filter functionality to group the applicable data.

Note: The number of remaining payments reflected on the report is displayed on the Job Info tab as the number of annual payments and the number of remaining payments for the employee for any P position type. If the LEA uses S acct types or business allowances for extra duties, S position types on this report should reflect the correct number of remaining payments. Prior to continuing, make the necessary position corrections.
