Select Columns to Print

The Please Select Columns to Print lookup is used to select budget columns to print.

Select columns to print:

- By default, all columns are selected. Clear any columns you do not want to include on the report.
- Click **OK** to accept the selections and return to the report parameters page, or click **Cancel** to return to the report parameters page without clearing any column options.
- The **Select Columns to Print** report parameter displays a Y for each label print option chosen and an N for each column not selected.
