Select Property Classes

The Property Classes lookup is used to select one or more property classes.

Select a property class:

- The property classes are listed in ascending order.
- To search for a specific property class, begin typing the property class or reference description in the **Search** field. The list is automatically filtered to display the property classes that contain the numbers or characters that you have typed.
- When you locate the property classes to be included, select the corresponding check box and click **OK**. The lookup closes, and the field/parameter is populated with the selected property classes.
- Click **Cancel** to close the lookup without selecting a property class.
