Include Reports i

Include Reports

The Include Reports window lists additional specialty reports that can be included with the original report.

1. Select the check box next to the reports to be included. Report check boxes that are disabled indicate that report data is not available for that report.
2. Clear the check box to deselect a report.
3. Click **OK** to accept your selections and to return to the report page, or click **Cancel** to return to the report page without making changes.
