Reset Approval Path Purchasing

Select to reset the approval path of a requisition when the amount or account is changed by an approver during the approval process.

If selected and changes are made to a requisition, the requisition is automatically returned to the originator and must be resubmitted by the originator. After the requisition is resubmitted, it must go through the approval path again. When a change is made, an email message is sent to the originator.

If not selected, changes are allowed by the approver and the requisition continues through the approval path.
