Create EFT File - GRT8020

Grants and Projects > Utilities > Grant Payments > Create EFT File

This page is used to create an EFT file for the bank to process EFT payments for grant reimbursement requests.

Electronic fund transfer (EFT) is a method of electronically transferring funds to a vendor for payment. The transfer is accomplished by creating an EFT file during a payment run. The file is then given to the fiscal agent's bank to be transmitted to an automated clearing house (ACH). The ACH is a centralized, federal reserve bank that transmits the necessary data for electronically transferring funds to the vendor's participating depository financial institution (DFI).

Note: The member's bank information must be completed on the Grants and Projects > Tables > SSA Members > Bank Code tab. Otherwise, the create EFT file process cannot be performed.

Modify a record:

Select a student

The following receiving options selected on the Options > Purchasing Options page in District Administration determine how information is displayed as well as if certain requisition items can be received on this page.

- If **Use Blind Receiving** is selected, order quantities are not shown on this page.
- If **Allow Partial Receiving** is not selected, only complete requisition items can be received.
- If **Allow Receiving Overage** is not selected, only the original item quantity ordered or less can be received.
