# Copy School Calendar - HRS2700

*Human Resources > Tables > Workday Calendars > Copy School Calendar*

This tab allows you to reuse a previously created calendar.

## Copy a school calendar:

Under **Calendar Info**:

Field	Description
<b>Frequency</b>	Click <input type="button" value="v"/> to select the pay frequency that you wish to copy. Only pay frequencies that have calendars are available in the drop-down list.
<b>Calendar Code</b>	Click <input type="button" value="v"/> to select the calendar that you wish to copy. When you select a calendar code, the calendar information for the pay frequency is displayed below. Verify that this is the calendar you want to use.

The calendar information for a specific pay frequency is displayed. Pay frequencies that have established calendar options are displayed on the right side of the page. Pay frequencies for these calendars are denoted by a check box.

- A pay frequency with a check box outlined in red has a calendar already. If you select this pay frequency, the existing calendar is overwritten.
- A pay frequency with a plain check box has district options set up but no calendar.
- A pay frequency with no check box has no district options set up for the frequency.

Click **+Add**.

<b>Calendar Code</b>	Type the two-character, locally assigned code (e.g., 01, A1) for the calendar.
<b>Calendar Description</b>	Type the description for the calendar (e.g., Administration, Bus Drivers). The field can be a maximum of 20 characters.

Select the payroll frequency to which you want to copy the calendar.

**Note:** To copy an existing calendar from one pay frequency to another pay frequency within the same year (current or next), you do not need to insert a new row for the same calendar code. Select the frequency check box to which the calendar should be copied. The new **Calendar Code** and **Calendar Description** fields are disabled. The Freq field is cleared, and a check box outlined in red is displayed for each pay frequency with a valid calendar.

Click **Save**.

## Other functions and features:

**Reset** Click to reset all previously selected options to the default.
