# HRS3550 - School YTD Accrual Payroll Account Distr

## ***Payroll > Reports > Year To Date Reports > School YTD Accrual Payroll Account Distr***

The report provides the accrual account distribution journal based on the school year entered. The current **TRS Year** flag (as set on the Staff/Job Pay Data > Job Info tab) is used to determine if the employee is nonstandard and will also be used if previous school years are selected for the report.

If the variance report parameter is selected, the user cannot select a specific pay type or primary campus. The variance report prints after the first report and only prints for employees where the amounts reported for the distribution history do not match the amounts in the school year-to-date record for the reported school year.

**Note:** Report processing time may be delayed if all employees are selected.

In order to generate this report, the **Calculate Accrual Salaries** field must be selected on the [Payroll > Tables > District HR Options](#) page.
