Mass Update W2 Employer Sponsored Health Care - HRS6370

Payroll > Utilities > Mass Update W-2 Employer Sponsored Health Care

This utility is used to mass update all employees' employer-sponsored health coverage amounts (i.e., the **Emplr Sponsored Health Coverage** field on the Maintenance > Calendar YTD > Calendar YTD Data page) in a single occurrence. The user can mass update data based on pay frequency(ies), from/to pay dates, deduction code(s), and from/to amounts from the employees' pay history. This amount is reported in Box 12 for code DD - Cost of employer-sponsored health coverage on the employee W-2 Form.

Once the data is updated using this page, the changes are reflected in the individual records.

The preview report is sorted in ascending order by the employee name, pay frequency, pay date, and deduction code.

Note: If updating tables, create an export using Export Pay Tables prior to using this utility. A backup is not offered.
