Local Annual - HRS2300

Human Resources > Tables > Salaries > Local Annual

This tab is used to automatically reference the correct annual salary for employees, based on their pay grade, pay step, max days employed, and local schedule code. This table could be used for creation of salaries for those employees, such as teaching staff, whose pay is based on an annual amount with step increases for years of service.

On the Job Codes table, this salary concept could then be attached to the applicable job(s). When the job is selected on the Job Info tab, the system populates the **Base Annual** field automatically in the **Daily Rate** section on that page and can calculate the daily rate based on the number of days employed. In addition, when the Mass Update Salary Calculations feature is used, the system uses this table to extract the correct salary information, perform calculations, and populate many fields on the Job Info tab.
