## Warehouse > Maintenance > Create/Modify Inventory Restock Requisitions

This page is used to initiate a purchase order to restock the warehouse. The items ordered through this page will have an inventory number. Data may be maintained and posted on this page.

Restock requisitions flow through the approval process and build User Approval Table Key records when the **Allow for Approval Process (Restock Requisition)** field is selected on the Tables > Warehouse Options page. In addition, the status of the requisitions are set to *P - Pending Approval*, and the purchase order number is not assigned at this time. Approvers in the approval path automatically receive email messages as necessary.

### Create or edit a restock requisition:
