# Fund/Fiscal Year - BWH6400

## Warehouse > Utilities > Mass Delete Requisition Records > Fund/Fiscal Year

This tab is used to mass delete warehouse and restock requisition records based on the fund and fiscal year selected. Old requisition records are periodically deleted.

- This process only deletes requisitions if the following conditions apply:
  - The requisition has become a purchase order.
  - The purchase order balance equals zero.
  - All check transactions have been printed.
  - The purchase order is fully liquidated.
- A requisition that has not become a purchase order is reversed and deleted. A report is displayed for a requisition that has multiple account codes with different funds/years and the following conditions apply:
  - Multiple funds/years are selected.
  - Not all the funds/years exist for the requisition.
  - The requisition has not become a purchase order (or if the requisition has become a purchase order, the purchase order balance is zero, the check transactions have been printed, and the purchase order has been fully liquidated).

### Additional process notes

- If a restock or warehouse requisition is pending:
  - The workflow and workflow history is deleted.
  - This process reverses encumbrance general journal transactions created during the approval path process and updates the general ledger.
- In addition, if a warehouse requisition is pending:
  - If the requisition accounting period is set to the current accounting period, only those requisitions created in the current and previous accounting periods are deleted.
  - If the requisition accounting period is set to the next accounting period, only those requisitions created in the next accounting periods are deleted.
  - If the requisition accounting period is set to the current accounting period and transactions exist in the next accounting period, those requisitions can only be deleted in the next accounting period.
- If a restock or warehouse requisition is saved, all requisition information is deleted.
- If a restock or warehouse requisition is returned, all requisition information is deleted, along with the workflow and workflow history.
- If a restock or warehouse requisition is approved:
  - All requisition information is deleted, along with the workflow and workflow history.
  - This process reverses encumbrance general journal transactions for unprinted shipping orders, unfilled back orders, and due to/due from transactions.
- In addition, if a warehouse requisition is approved:
  - This process reverses encumbrance general journal transactions for unprinted shipping orders, unfilled back orders, and due to/due from transactions.
  - An Inventory Audit transaction reversal is created.
  - A Finance Inventory transaction reversal is created.

**Mass delete requisition records by fund/fiscal year:**

Select one or more of the following **Options** to initialize:

| <b>Field</b>                | <b>Description</b>  |
|-----------------------------|---|
| <b>Zero Reorder Level</b>   | Select to reset all reorder levels to zero.   |
| <b>Clear Last Restock</b>   | Select to reset all last restock dates.   |
| <b>Clear Last Requested</b> | Select to reset all last requested dates.   |
| <b>Execute</b>              | Click to execute the process. After the process is completed, the <b>Used to Date</b> field for each included inventory item record is reset to zero on the <a href="#">Inventory Maintenance - BWH3000</a> page. |

A message indicating that the initialization process completed successfully is displayed. Click **OK**
