About Warehouse

The ASCENDER Warehouse application allows you to request items from the district warehouse. Warehouse functions also provide a means to restock the warehouse, receive items into the warehouse, return items from the warehouse, and fill backorders.

In addition, the following functions are available:

- Approve purchasing/inventory restock requisitions
- Cancel backorders (for current year and next year)
- Cancel end-of-year outstanding back orders
- Create and modify inventory restock requisitions
- Create and modify warehouse requisitions (for current year and next year)
- Fill backorders (for current year and next year)
- Initialize yearly inventory files
- Maintain inventory
- Mass change item numbers
- Receive inventory items
- Return warehouse items
