API Usage Report 1

API Usage Report

This report will display CareerPortal API usage. Since the API has not yet been released, the report will not display any data.

This report is available for developers only.

Basic Navigation See Navigation and Search for more information about basic navigation and search options on the page.

Return to Admin Tools You can return to the Admin Tools page at any time by clicking **Admin Tools**.

Records Click **Records** to select the number of records to display.

Field	Description
Action	The name of the web method (or service) the API is requesting.
Calls	The number of times the method has been called. This number includes both successful and failed calls and should equal the total of **SuccessfulCalls** and **FailedCalls** combined.
SuccessfulCalls	The number of times the method, after being called, successfully returns a result.
FailedCalls	The number of times the method, after being called, failed to return a result. There can be any number of reasons a method does not return a result.
MinTimeMS	The fastest successful call to the method in milliseconds.
MaxTimeMS	The slowest successful call to the method in milliseconds.
AvgTimeMS	The average of successful calls to the method in milliseconds.
