Content Management

CareerPortal allows you to change content using predefined content sections throughout the application. One edit is all that it takes to change all predefined content sections. Managing your content sections is facilitated using the Content Management page.

Content sections can be added to multiple pages. Each content section is identified by a Content ID that allows all pages with a particular Content ID to display the same information. All content section edits, deletions, or additions are made using the Content Management page.

At this time, the only content section available is on the homepage.

Basic Navigation See [Navigation and Search](#) for more information about basic navigation and [search](#) options on the page.

View content sections

Field	Description
Preview	<i>With Changes:</i> Preview content as it appears in its edited state (what your are currently editing). <i>Current:</i> Preview content that is currently published. <i>With Previous Content</i> Preview content published before the current content.
Content ID	Displays the content ID.
Content Name	Displays the content name.
Content Description	Displays a description of the content.
Publish	Publish or revert your content additions and edits. <i>Publish Content:</i> Publish content that is currently in the editor. Note: Previously published content is saved and is accessible using the <i>With Previous Content</i> option in the Preview field. <i>Rollback Content:</i> Restore previously published content. Content that is replaced by the revert is moved back into the editor.
Edit	Open the editor on the Edit Content Management page.
Display	Enable or disable content sections. Click ✓ or X to enable or disable a content section.
