Reference Requests 1

Reference Requests

The CareerPortal reference request feature allows you to choose when to request an applicant’s references. On the applicant side, an applicant is asked to provide the names and email addresses of a specified number of references when applying for a job. On the hiring side, you can choose when to request those references with the click of a button.

This feature comprises [configuration settings](#), [forms](#), and [core questions](#). See [forms](#) and [core questions](#) to learn how forms and core questions work together. Before proceeding, ensure that you have the proper permission level to access the [configuration settings](#) page.

Edit reference requests

The configuration settings page is used to set up and customize the reference request feature. To edit or customize the reference request feature, go to the Configuration Settings page.

Field	Description
ReferenceRequestText	ReferenceRequestText This configuration setting allows you to customize the message that is sent to the applicant's references provided on the application. The message uses placeholders for values found in the applicant's application (e.g., [RecipientName], [ApplicantName], and [PositionName]).
Edit	Edit the ReferenceRequestText configuration setting. The Edit Configuration Settings pop-up window is displayed.
Value	Type your edits.

Click **Update** to update the configuration setting.

Update the information.

Cancel and return to the previous page.
