Before You Begin

Set-up Tip

After logging in to the **Apps** dashboard, complete the following steps to help prevent dashboard timeouts:

- ☐ Open the **ASCENDER Enterprise**.
- ☐ Launch **ASCENDER DataConnect**.
- ☐ Keep both tabs open.

NOTE: Keeping both **ASCENDER Enterprise** and **ASCENDER DataConnect** open allows users to easily navigate between two application and helps prevent dashboard timeout issues.

Navigating to the Level 1 Errors in ADC

1. Access the ASCENDER DataConnect (ADC) tool.

The screenshot shows the ASCENDER Data Runs dashboard. At the top, there's a navigation bar with the ASCENDER logo, links to Dashboard, Data Explorer, and Schedules, and buttons for 'Create New Run' and 'Logout'. Below the navigation bar, the breadcrumb trail is 'Dashboard / Data Runs'. There are filter buttons for 'Status' and 'District', and a 'Clear All' button. A search bar labeled 'Search runs...' is present. The main content is a table with the following columns: STATUS, DISTRICT, ODS, SCHOOL YEAR CATALOG, STARTED, DURATION, and ACTIONS. The table lists six runs, all with a status of 'COMPLETE' and a duration of 0s to 51s. The 'ACTIONS' column for each row contains a 'View' button.
