Create a Book of Help Pages

The book option on wikiHelp allows you to create a book of multiple pages (the plugin limit is approximately 80 pages per book), which you can then download and/or print. For example, these steps can be used to print all Help pages for an application, or to create a customized book containing pages you need for a training.

- On the page you want to add to the book, click the **Add to book** link. To create a book of all Help pages for an application, start with the first page of the first menu and continue adding pages in menu order.

The screenshot displays the ASCENDER online help interface. At the top left is the ASCENDER logo with the tagline 'ELEVATING TECHNOLOGY SOLUTIONS'. A search bar is located at the top right. Below the logo, the page title 'District Administration' is shown. A green breadcrumb trail reads 'Trace: • ASCENDER Online Help • Receiving Addresses - DA1100'. On the left side, there is a 'Table of Contents' menu with categories like 'ASCENDER Online Help', 'Browser Settings', 'Helpful Tips', 'Tables', 'Options', 'Maintenance', 'Workflow', 'Utilities', 'Reports', 'Checklists', and 'Printable Help'. The 'Tables' section is expanded to show 'Receiving Addresses - DA1100'. The main content area is titled 'Receiving Addresses - DA1100' and includes a breadcrumb trail 'District Administration > Tables > Receiving Addresses'. A green callout box contains the text: 'This page is used to create a contact list of receiving addresses for the LEA. There can be multiple receiving sites at one campus and multiple addresses for a single person.' Below this, there are sections for 'View and edit a receiving address:' and 'Add a receiving address:'. A context menu is open on the right side of the page, listing options: 'Old revisions', 'Add to book' (highlighted), 'Copy this page', 'Export to PDF', 'Fold/unfold all', and 'Back to top'.

- Once the page has been added, the **Add to book** link changes to **Remove from book**. You can also click **Remove this page from your book** at the top of the page to remove the page.

Receiving Addresses - DA1100

District Administration > Tables > Receiving Addresses

This page is used to create a contact list of receiving addresses for the LEA. There can be multiple receiving sites at one campus and multiple addresses for a single person.

View and edit a receiving address:
 A list of existing receiving address records is displayed in the grid. Click Q to view and edit the details for the selected receiving address. The details are displayed in the free-form area at the bottom of the page.

Add a receiving address:

Old revisions
 Remove from book
 Copy this page
 Export to PDF
 Fold/unfold all
 Back to top

- Add any number of pages to the book by clicking the **Add to book** link or clicking **Add this page to your book** at the top of the page (this option is displayed after at least one page has been added to the book). You can continue to go through the Help pages in menu order, for example.

Freight Terms - DA1210

District Administration > Tables > Freight Terms

This page is used to create freight terms indicating the transport/carrier type and payment responsibility. The freight term codes are used in the Purchasing bid process.

Create a freight term:
 A list of existing freight terms is displayed in the grid.

Help

- When you have added all the pages you want to your book, click **Manage book (# page(s))** where # is the number of pages in the book.

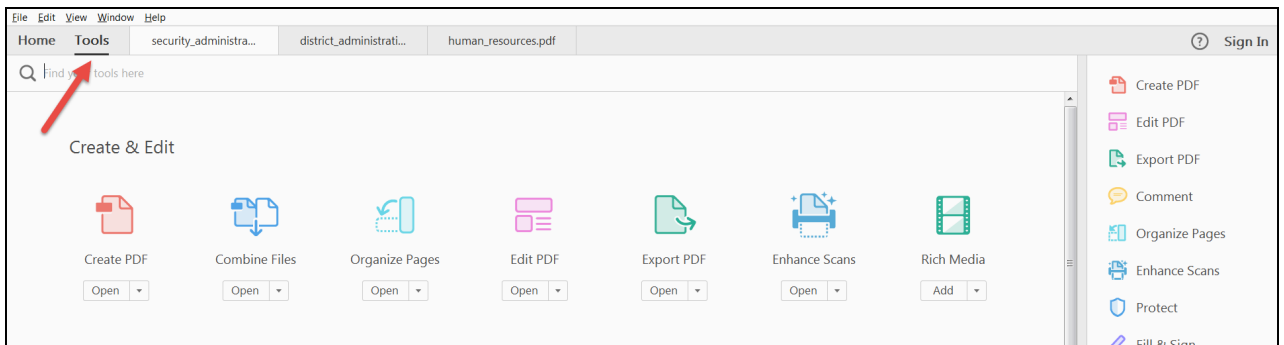

- The ebook page is displayed with a list of the pages you currently have in the book.

- In the **Export Selection** section, type a title for your book (the title that appears is the last title you used).
- The tcc-help.net wiki does not have forbidden pages. The **Skip Forbidden Pages** selection will not do anything.
- Select either **Export selection to PDF** or **Printable version** and click **Export**.
 - **Export selection to PDF** will save a copy of your pages as a PDF. The file is downloaded to a folder based on your browser settings.¹⁾
 - **Printable version** generates a single HTML page comprised of all your pages. You can print or save the page using browser options.
- Return to pages by clicking the link under **Selected Pages** to remove pages individually or click **Clear Selection** to remove all pages from your book.

Use Adobe to Create Books

If you need to create a book that spans multiple applications follow these steps. You will need to use Adobe Acrobat Pro to do this.

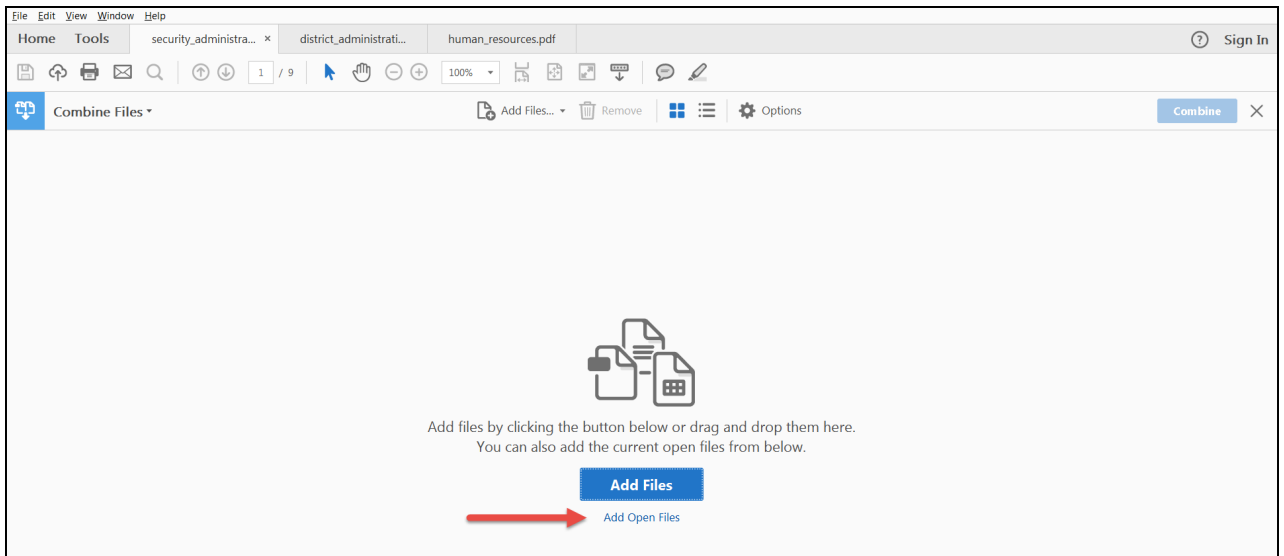

- Create multiple books using the steps above for each system (e.g., Business, District Administration, and Security Admin).
- Using Adobe Acrobat Pro open all the books you created, as well as the front and back cover, if so desired²⁾.
- Click **Tools**.

- Click **Combine Files**.

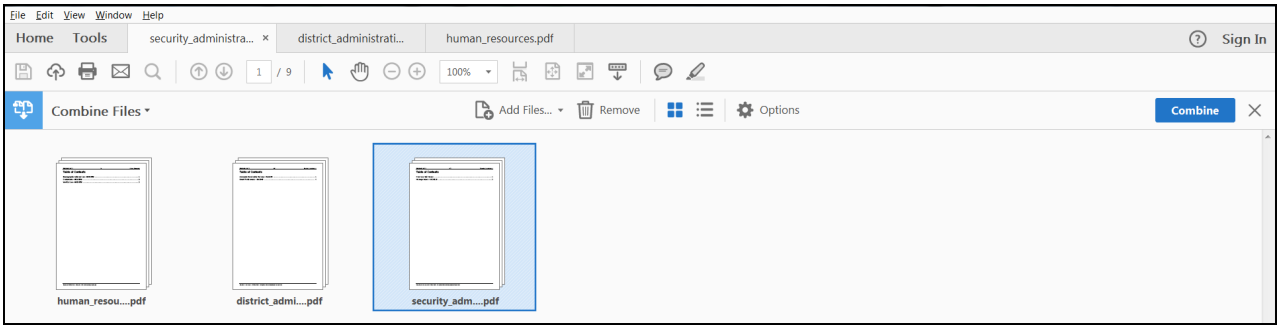

- Click **Add Open Files**.

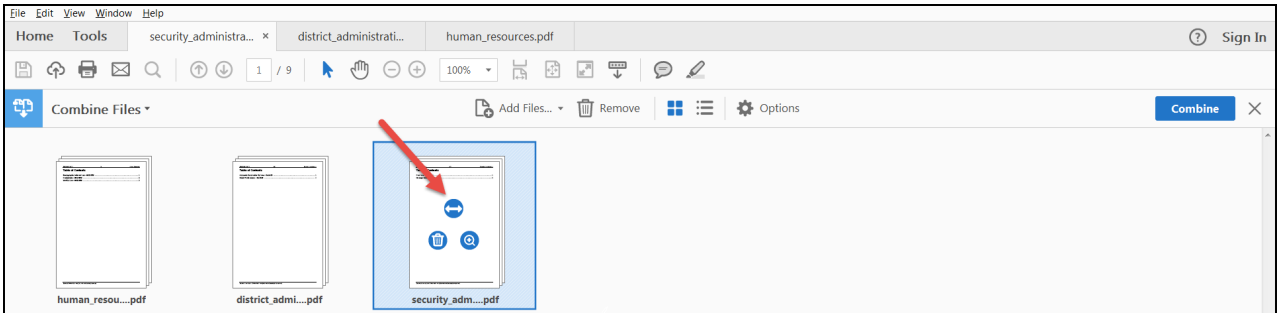

- Click **Add Files**.

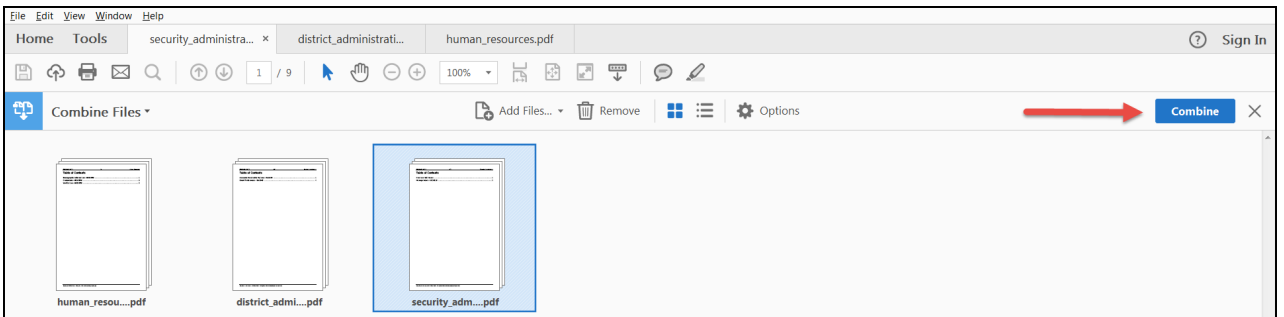

- Drag and drop the books into the order you want.

- To move individual pages, click the double arrow to expand the selection.

- Once you have ordered the book the way you want, click **Combine**.

- Under File, click **Save**.
- Choose where you want to save the book and a name for it.

1)

Saving the book as a PDF will allow you to then save it as a Word document and make any required changes to it.

2)

covers can be found on the Printed Help page
