

ASCENDER GUIDES

admin_settings_alert_body

Table of Contents

This page allows you to set district-level schedule for the parent alert messages, as well as several district-level security settings.

Alerts refers to the update that occurs in the system.

Notification refers to the text or email message that is set to the parent as notification that there is an alert. Notifications do not have to go out at the same time the alert occurs.

The screenshot shows a 'Set Alerts' form with a light blue header. Below the header, there are three input fields: 'Start Time' with a dropdown menu showing '8:00', 'End Time' with a dropdown menu showing '18:00', and 'Interval' with a text input showing '1' and a 'Mins' label. To the right of these fields is a blue 'Save' button.

Set Alerts

Start/End Time	Select the start and end times to specify the time of day when alerts are generated.
Interval	Type the number of minutes that will elapse between each alert during the specified time.
Revert	Click to...

Set Notifications

Start/End Time	Select the start and end times to specify the time of day when notifications are sent to parents.
Interval	Type the number of minutes that will elapse between each notification during the specified time.
Revert	Click to...
