HELPFUL FEATURE: As you initially enter address information (street number, street name, city, state, and zip), it is automatically stored so it can be reused to prefill the fields when you are completing multiple forms that contain address fields.

Once you have entered address data, when you click in a blank field for which data can be prefilled, a blue box is displayed which contains the most recent address data entered so far. When you click the blue box, the address fields are automatically filled with the stored information.

This feature works when adding or editing address data in either the **Family Addresses** window or the **Family Contacts** window.
