Modified the program to allow the deletion of TRS On-Behalf journal entries. Now, a trashcan icon is displayed for these entries.

Update 3.5.0182

## Grants and Projects

### Grants and Projects > Reports

Removed this menu option as it is not currently available. Previously, the menu displayed the Bank Reconciliation Reports, which resulted in a program error if selected.

## Finance

### Finance > Utilities > Fiscal Year Close

Corrected the program error that occurred when you accessed the page. This issue was caused when the total number of funds in the file ID was a multiple of 15. For example, 15, 30, 45, 60 caused an issue but 18 did not even though the first page had the maximum.

[Update 3.5.0181](#)

Update 3.5.0181

## Grants and Projects

The Grants and Projects is a new application that allows you to view grant/project data for the entire grant period regardless of the fiscal year. The application includes the following pages:

### Grants and Projects > Tables > Grants and Projects Table

Added this page to define grant codes that can be tracked in the Grants and Projects application.

### Grants and Projects > Inquiry > GL Inquiry

Added this page to perform the general ledger inquiries for a specific grant/project code.

## District Administration

### District Administration > Maintenance > User Profiles > Grants and Projects

Added this tab to assign specific grant code(s) to users allowing them to view the grant code details in the Grants and Projects application.

## Finance

### Finance > Maintenance > Postings > Journal Budget & Journal Actual

Added the **Ignore for Grants and Projects** check box allowing you to indicate that all entries for the JV should be ignored for the Grants and Projects application. For example, a user can post a JV in a file ID and it will not be displayed in the Grants and Projects inquiry. This can be helpful with auditor's entries.

### Finance > Maintenance > Fiscal Year Close

Corrected the issue that allowed a single fund with multiple years separated between pages to be incremented instead of being defaulted to only allow the fund to be continued. For example, if fund 616/8 was listed on one page and 616/9 was listed on the next page, the **Increment** option should not be available for 616/8.

Corrected the issue with possible out-of-balance issues stemming from running the closing process. Now, the Finance > Utilities > Out of Balance Correction utility is processed prior to processing any of the Fiscal Year Close functions.

Corrected the issue that prevented report headers from being displayed if there was nothing to report on the Fiscal Year Close pre-post Unprocessed Budget Amendment report; only a blank page was displayed.

Corrected the pre-post JV report to retrieve the Finance end-of-year stored procedure to accurately generate the opening entries.

Modified the program to identify the purchase order encumbrances created for rollover funds in order to prevent them from being displayed multiple times in the Grants and Projects inquiry.

#### [Update 3.5.0180](#)

Update 3.5.0180

## Human Resources

### Human Resources > Maintenance > Staff Demo

Corrected the Document Attachments issue that prevented the **Driver License** option from being displayed in the Document Upload Type drop-down list.

Update 3.5.0177

## Known Issues

These issues are a high priority and will be corrected as quickly as possible.

Per IRS requirements, modified this tab to accommodate the income tax guidelines for calendar years greater than 2019.

For tax years less than or equal to 2019, the original data fields are displayed (except for the table column headers, which changed per IRS documentation) and data is saved per marital status and per pay frequency.

For tax years greater than or equal to 2020, the new data fields are displayed and data is saved per the following guidelines:

The pay frequency for these rate tables will be empty as the rate tables are now stored as annual amounts. When payroll calculations are processed, the rates will be divided by 26, 24 and 12 for each of the respective pay frequencies (4, 5, and 6).
