Grants and Projects

Update 3.5.0XXX

Finance

Finance > Maintenance > Fiscal Year Close

❑ Corrected the issue that allowed a single fund with multiple years separated between pages to be incremented instead of being defaulted to only allow the fund to be continued. For example, if fund 616/8 was listed on one page and 616/9 was listed on the next page, the **Increment** option should not be available for 616/8.

❑ Corrected the issue with possible out-of-balance issues stemming from running the closing process. Now, the Finance > Utilities > Out of Balance Correction utility is processed prior to processing any of the Fiscal Year Close functions.
