

ASCENDER Business Known Issues

ASCENDER Business Known Issues

Release Date: 9/3/2021 **ASCENDER Update:** 6.0.100

These issues are a high priority and will be corrected as quickly as possible.

Payroll > Utilities > Import WorkJournal Requests

- The **Pay Date (MM-DD-YYYY)** field is not properly handling a manually entered date. The ellipsis icon should be used to select a pay date.

Personnel > Tables > WorkJournal

- The **Enable WorkJournal Time for Pay Types** options are not functioning as intended. Currently, all pay type 2 and 3 employees are available for WorkJournal purposes in EmployeePortal.

EmployeePortal > WorkJournal

- When an employee is creating timesheet entries for a work day, the program is allowing entries to overlap if they are different segments of time. For example, an employee can create an entry from 8:00 AM - 4:00 PM and cannot enter the exact same entry, but they can create entries with different time segments such as 8:00 AM - 11:00 AM and 12:00 PM - 4:00 PM.
- The program requires an employee to enter a **Time In** and **Out** for an entry and then allows them to return at a later time to edit the entry. However, the program should allow employees to create an entry with only a **Time In**.
