

ASCENDER 9.0300

Release Date: ASCENDER Update: 9.0300

Payroll > Maintenance > Approve CIP Transaction

☐ Modified Personnel extracts to properly report TSDS data. The Change in Position (CIP) process will now evaluate whether TSDS number of days employed records need to be updated with an end date or inserted with begin dates.

This fix also corrects the previously known issue in 9.0200. When a CIP was approved, the system was erroneously doubling the **Percent Day Employed** value.
