# ASCENDER 9.0300

**Release Date:** 11/1/2024 **ASCENDER Update:** 9.0300

## Payroll > Maintenance > Approve CIP Transaction

☐ Modified Personnel extracts to properly report TSDS data. The Change in Position (CIP) process will now evaluate whether TSDS number of days employed records need to be updated with an end date or inserted with begin dates.

This fix also corrects the previously known issue in 9.0200. When a CIP was approved, the system was erroneously doubling the **Percent Day Employed** value.

---

## Personnel > Maintenance > Employment Info

☐ Modified the calculation for the **Pct Day Employed Effective Date** field. The previous calculation, End Date = Effective Date - 1, has been replaced with End Date = Effective Date. This aligns the End Date with the Effective Date .

---

## Personnel > Utilities > Mass Delete

☐ Modified the program to include the TSDS days employed in the mass deletion process.

## **Back Cover**
