Payroll > Maintenance > Approve CIP Transaction

Corrected the issue that caused the following SQL error to occur when trying to approve CIP transactions: *SQL Anywhere Error 274: Procedure or trigger calls have nested too deeply.*

Personnel > Maintenance > TSDS Days Employed Set

Added a new page to keep a record of the number of days an employee has been employed for TSDS reporting purposes and manage begin/end dates if corrections are necessary. Each record displays the percent of day employed, the TSDS number of days employed, the begin and end dates, a date timestamp indicating when the record was created, and the module within the system where the update originated.

| Percent Day Employed | TSDS # Days Employed | Begin Date | End Date | Update DTS | Module |
