

# ASCENDER 9.0305

**Release Date:** 11/11/24 **ASCENDER Update:** 9.0305

## Business Known Issues

### Payroll > Maintenance > Approve CIP Transaction

- Corrected the issue that caused the following SQL error to occur when trying to approve CIP transactions: *SQL Anywhere Error 274: Procedure or trigger calls have nested too deeply.*

### Personnel > Maintenance > TSDS Days Employed Set

- Added a new page to keep a record of the number of days an employee has been employed for TSDS reporting purposes and manage begin/end dates if corrections are necessary. Each record displays the percent of day employed, the TSDS number of days employed, the begin and end dates, a date timestamp indicating when the record was created, and the module within the system where the update originated.

The screenshot shows the 'Maintenance > TSDS Days Employed Set' page. At the top, there is a green header bar with a home icon, the page title, and a 'Personnel' dropdown. Below the header is a search bar with a 'Save' button. The main area contains a table with the following columns: Percent Day Employed, TSDS # Days Employed, Begin Date, End Date, Update DTS, and Module. A message 'No Rows' is displayed below the table.

Percent Day Employed	TSDS # Days Employed	Begin Date	End Date	Update DTS	Module
No Rows
