

Release Date: TxEIS/ASCENDER Update:

Corrected the issue where the Staff Association Interchange in the Classroom Roster - Fall collection was retrieving student end dates from track 1 and teacher end dates from track 2. Now, the program will reference the tracks for students enrolled in the course instead of all tracks on the campus when determining teacher end dates. If there are students in more than one track who are enrolled in the course, the program will identify the maximum end date among the tracks.

NOTE: This issue only affects LEAs that have tracks with different semester end dates on the same campus.
