Corrected the utility for *Early Childhood Data System - KG* to create the Staff and Staff Section Association records correctly for Student-only districts that enter data on the Fall Staff Maintenance page rather than using the Import Staff File utility to import staff records.

Modified the program for *Early Childhood Data System - KG* so that the Staff Association Interchange includes only the **Selected Staff**.

Modified the program for *Early Childhood Education - KG* to correctly create the Education Organization interchange when one or more tracks has a **1st Period Nbr** on **Attendance > Maintenance > Campus > Campus Options** that is higher than 00 or 01.

Update 3.5.0170

Update 3.5.0170

State Reporting > Utilities > Create TSDS Core Collections Interchanges

Modified the extract to only extract one course-section using the meeting time for the Teacher of Record, which is based on the as-of date entered and the meeting time for the teacher with the lowest period and class role who is actively teaching the class on the as-of date. This information will be used for information on teachers, teacher sections, master schedule, and student sections. If the meeting time has a different beginning and ending period, the beginning period will be used as the course period to avoid duplicate sections.

Modified the *Early Childhood Data System - KG* Core Collection interchange to first look at the **KG Beginning of Year** field on **Registration > Maintenance > Student Enrollment > Demo2** when determining if the student should be included in the interchange. If the **KG Beginning of Year** field is blank, the **As-Of Date** field on this utility page is used to determine if student should be included, as well as the course-sections and instructors to include.

NOTE: The **As-Of Date** field is required, because it is used as the staff association date as well as for determining the course-section in the the master schedule.
