Update: 6.0380

ASCENDER 6.0380

Release Date: 12/6/21 **ASCENDER Update**: 6.0380

Registration > Reports > Registration Reports > Student Report Group

❏ Modified the SRG6000 - Pandemic Electronic Benefit Transfer (P-EBT) (2021 Summer) report with the following:

- Added an underscore to the **District_ID** header
- Added programming so that **Campus_ID** will extract the 9 digits (County ID, District ID, Campus ID) required by the Texas Health and Human Services Commission. (HHSC)

After setting up the local program PEB for the campus and adding the local program PEB to students, users will navigate to Registration > Reports > Registration Reports > Student and click on SRG6000 – Pandemic Electronic Benefit Transfer (P-EBT) (2021 Summer). The user then enters Ending School Year 2022 and Local Program Code PEB. To get the district extract that will be uploaded to www.YourTexasBenefits.com, the user has two options:

1. Click on Preview. A file called PEB_File.csv will automatically be downloaded which contains all the students that were coded with PEB local program code for the district. A second window will also open with the SRG6000 report preview. The top right corner of the report preview has two icons. One icon is to download a PDF version of the SRG6000 report, and the second icon is to download an Excel version of the SRG6000 report. Note that the Excel icon produces a csv that is not called PEB_File.csv, instead the name starts with "DRptSrg6000PEBT…". DRptSrg6000PPEBT should not be used to upload into www.YourTexasBenefits.com since characters such as "=" and "+" are being inserted into the file that is causing the file to be rejected. Only use the file called to PEB_File.csv to submit to HHSC.
2. Click on PDF. A file called PEB_File.csv will automatically be downloaded which contains all the students that were coded with PEB local program code for the district. A second window will also open with the SRG6000 report that can be downloaded as saved as PDF report. Only use the file called to PEB_File.csv to submit to HHSC.

The "DRptSrg6000PEBT…" csv file is for informational purposes only (it may insert character that may cause upload errors) and contains students in the district with the local program code of PEB.

The PEB_File.csv file should be used to submit to www.YourTexasBenefits.com and contains students in the district with the local program code of PEB.

> **IMPORTANT**: The district should inspect the file before uploading to HHSC to ensure that all mandatory fields are there for every student. For example, if the student does not have a zip code in the system, the information will not extract to PEB_File.csv for that student. In turn, this would cause the file to be rejected by HHSC. The file should be inspected by making a copy of the file and inspecting the copy, leaving the original that will be submitted to HHSC intact, thereby, preventing data from getting distorted. If there is missing data for any particular student in any column, the district can go back to ASCENDER and input the data in the appropriate screen and re-run the extract.

Update: 6.0375

ASCENDER 6.0375

> **Release Date**: 11/30/21 **ASCENDER Update**: 6.0375

Grade Reporting > Utilities > STAAR/TAKS Precoding Extract

❑ Modified the current **STAAR Alternate 2**, **3-8** and **EOC** extracts to conform to the new Cambium file layouts.

To code students for STAAR Alternate 2 3-8 ensure the student is (1) enrolled in special education with a primary disability selected and an Exit Date of blank on Registration > Maintenance > Student Enrollment > SpecEd, and (2) coded as taking STAAR Alternate 2 (i.e., T: STAAR Alternate 2 in Precoding STAAR status) in all subjects on Test Scores > Maintenance > Individual Maintenance > PRECODE.

To code students for STAAR Alternate 2 EOC ensure the student is (1) enrolled in special education with a primary disability selected and an Exit Date of blank on Registration > Maintenance > Student Enrollment > SpecEd, and (2) enrolled in an EOC course. For valid EOC Service ID's, refer to the Help Page.

Grade Reporting > Utilities > Online STAAR/TAKS EOC Extract
Grade Reporting > Utilities > STAAR/TAKS Precoding Extract

❑ Added a new option **Cumulative** to produce a cumulative precoding file for all the tests (i.e., TELPAS, TELPAS Alternate, STAAR 3-8, STAAR Interim, STAAR Alternate 2, STAAR EOC). The

Cumulative file can be executed from Grade Reporting > Utilities > Online STAAR/TAKS EOC Extract or STAAR/TAKS Precoding Extract. The functionality is identical.

Before executing the Cumulative option, the campus/district must execute the individual tests since the Cumulative file is built from the execution of the individual tests. For example, if only TELPAS is executed, the Cumulative will only contain TELPAS precoded students. If all tests are executed, the Cumulative will contain precoded students for all tests (including STAAR EOC, if executed, even though the execution functionality resides in a different screen). Executing the Cumulative option without executing any of the individual tests, will result in an error message, "No data to extract".

Currently, the Cumulative extract cannot be cleared. The district/campus can re-run an individual test to overwrite the contents of the Cumulative for that test, and, re-run the Cumulative, if desired.

Registration > Reports > Registration Reports

❑ Modified the Student Report Group to the create the SRG6000 - Pandemic Electronic Benefit Transfer (P-EBT) (2021 Summer) extract and report.

Districts may code students to extract students on the SRG6000 extract and report by completing the following:

- Go to Registration > Maintenance > District Profile > Local Program Codes and add a new local Program Code called PEB. To save, adding a Program Code to a student with an Entry Date that falls within the current school year is required. An Exit Date is optional to save. The Entry Date/Exit Date fields are not the Entry Date/Exit Date for NSLP and the information will not be included in the extract or report. There are optional fields for the extract and the columns will be empty.

- Go to Registration > Maintenance > Campus Profile > Campus Local Program Codes and add the PEB Program Code

- Add the local program code PEB to individual students through Registration > Maintenance > Student Enrollment > Local Program

- Add the local program code PEB to a group of students through Registration > Utilities > Reset Values using the Local Program Code in Item to Reset

- Verify all the students are coded properly by running SRG6000 and entering the parameter of Ending School Year (YYYY) as 2022. The extract will show school year 2020-2021.

- The extract/report parameter Include Withdrawn Students references students that withdrew from the local program PEB if an Exit Date for the student exists. If 'Y' is selected, withdrawn students from the program will be included in the extract/report. In that case, the Entry/Exit Date columns will be empty in the extract since they are optional fields. If 'N' is selected, withdrawn students from the program will not be included in the extract/report.

Update: 6.0220

ASCENDER 6.0220

Release Date: 10/22/21 **ASCENDER Update**: 6.0220

Discipline > Maintenance > Referrals

❏ Corrected an issue so that discipline referral information copies over to Discipline > Maintenance > Student > Maintenance when creating an incident.

Clients that used the utility while it was broken, resulted in incomplete or incorrect records.

Incomplete records:

The client clicked on a pending referral in Discipline > Maintenance > Referrals and checked the Create Incident box and Saved their selection. An incident number is generated and shows in TeacherPortal. The client is routed to the Discipline > Maintenance > Maintenance tab and the referral information was not copied, and the client **DID NOT** manually select the referral information (i.e., Location of Incident, Reported by, Administered by, and so on) to Save. Instead, they clicked out of the screen without completing the information. This has created a "ghost" record where the incident is not part of the student record in Discipline > Maintenance > Student > Inquiry. The incident also does not appear in the Referrals screen as pending, it shows as complete. The record is still in the database without referral details.

Through a DBA Assistant change, TCC has set the referrals back to pending so that clients can go back to the Discipline > Maintenance > Referrals screen and complete the incidents again.

Incorrect records:

The client clicked on a pending referral in Discipline > Maintenance > Referrals and checked the Create Incident box and Saved their selection. An incident number is generated and shows in TeacherPortal. They are routed to the Discipline > Maintenance > Maintenance tab and the referral information was not copied, and the client **DID** manually select the referral information (i.e., Location of Incident, Reported by, Administered by, and so on) and Saved. Upon clicking Save, the program created a new incident number, different from the first incident number that was generated. The incident shows as completed in Referrals and the incident is part of the student record in Discipline > Maintenance > Student > Inquiry. There is a discrepancy between the incident number in ASCENDER and TeacherPortal.
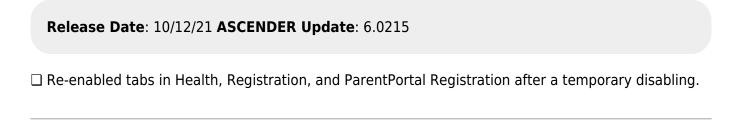

Through a DBA Assistant change, TCC has consolidated the incidents so that each incident has a matching incident number as shown in TeacherPortal.

❏ Added a validation to the utility so that **New/Hist Student ID** can only be changed to a valid student ID number.
