Grade Reporting > Reports > Grade Reporting Reports > Report Cards > SGR1160 - Interim Progress Report

Corrected the issue that prevented some grade averages from being displayed on the report even though the grades were posted and available.

ASCENDER TeacherPortal

Update 4.0.3.29

Grades

- Corrected the program to calculate and display averages as whole numbers.
- Corrected the following pages to properly display the cycle averages. Previously, the grades that were displayed on these pages were not the same as the cycle grades displayed on the Assignment Grades page.
 - Cycle Grades
 - IPR Comments
 - Print IPR
 - Print IPR by Average

Grades > Assignment Grades

Corrected the functionality of the **Calculate Averages** button. Previously, when a teacher entered grades and clicked the **Calculate Averages** button, without first clicking **Save**, to see what a student's working cycle average was, the program cleared the grades typed in before the teacher clicked the **Calculate Averages** button.
