Attendance > Maintenance > Student > Student Posting > By Individual

Modified the program to correctly display courses in which a student was enrolled on an absence date.

Attendance > Maintenance > Letters > Update > Letter

Corrected logic in the program so **{nbr_tardies}** will display correctly when Absence Type on the **Letter Criteria** tab is set to Tardy.

Attendance > Maintenance > Addtnl Days Program > ADSY Options

Modified programming to remove date validation enabling the user to enter any date throughout the year as an ADSY program day.

- ADSY days can be on any day throughout the year as long as the day remains non-compulsory and

does not take place on a required instructional day.

- ADSY days can be held during the summer prior to or before a school year (May - August), on designated intersessional days throughout the year, or on weekends.

Attendance > Reports > Attendance Reports > All > Membership Report Group

Modified the SAT5500 - Attendance Zones Street Detail Report so the error message produced will indicate *From Street Name must be less than To Street Name*.

Discipline > Reports > Discipline

A **Cyber** column was added to the following reports:

- SDS0260 - Discipline Offender Bully Harass Report
- SDS0265 - Discipline Victim Bully Harass Report
- SDS0800 - Offense Summary Report

Grade Reporting > Utilities > Grade Posting from ASCENDER TeacherPortal

Modified the program to correctly pull in and post semester grades from TeacherPortal for campuses using Standards-Based grading.

Registration > Maintenance > District Profile > Attendance Zones > CY Attendance Zone

Modified the program to increase the size of the surround box so that the **Date Capped** field is not cut off.

Modified the program so the user will get a warning message before deleting the last campus in an Attendance Zone segment giving them warning that they will be deleting the segment since there are no campuses associated with the segment anymore.

Registration > Maintenance > District Profile > Annual Student Data Rollover

Modified the program so that student SPPI-14 records for prior year leavers that are created during Annual Student Data Rollover utilize the student's Mailing Address instead of the Physical Address. If the Mailing Address is not available, the program will utilize the Physical Address.

Registration > Maintenance > Student Enrollment > Demo1

Modified the program to add indicators for **Child Find: SPPI-11** and **Child Find: SPPI-12** to the Demographic Information section. Enrolled students that can be marked Child Find SPPI-11 are between the ages of 3-21 years old as of September 1st. Enrolled students that can be marked Child Find SPPI-12 are between the ages of 0-3 (3 non inclusive) as of the Fall Snapshot date.

Registration > Maintenance > Student Enrollment > Contact

Modified the program to add *Space Force* to the **Branch of Service** drop-down menu.

Added *Space Force* and *Civilian Emp* to the SRG2000 - Student Contact Information report.

Corrected an issue in the program when the priority 1 Contact is marked for deletion in ParentPortal Registration, that the priorities will renumber (priority 2 becomes priority 1) when accepting Contact changes on the Pending Updates page on Registration > Maintenance > Online Registration > Pending Updates.

Registration > Maintenance > Student Enrollment > Local Programs

Modified programming to perform date validation for **Entry Date** and **Exit Date** using the ADSY Calendar and Track when the selected **Local Program** is ADP: Additional Days Program.

Registration > Maintenance > Student Enrollment

Registration > Maintenance > Online Registration > New Student Enrollment

Modified the program to prevent duplicate Student IDs from being created and to decrease runtime when auto-assigning new Student IDs.

Modified the program to save a **0** instead of blank values for *gen_ed_hmbound* and *parent_request_retention*.

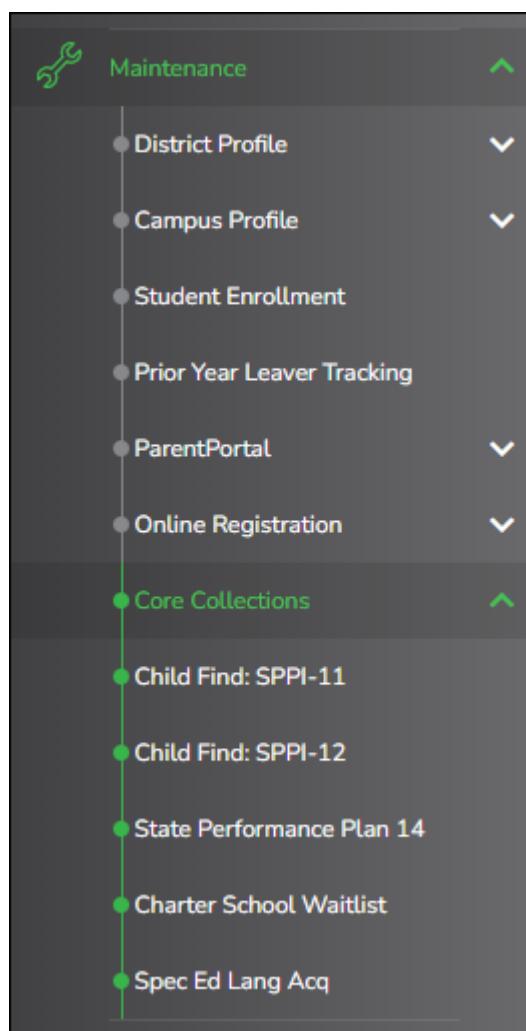

Modified DBA Assistant > Utilities > Update Database to update any blank values for *gen_ed_hmbound* and *parent_request_retention* to **0**.
