Registration > Utilities > Activate Students

Corrected the issue that caused the utility to indicate students as **No Show** instead of activating them.

Modified the utility logic so that when a student is activated after the first day of school and has special programs, the student record is updated with the first day of school set to No Show and a new row is added with the new entry date.

Registration > Utilities > Transfer > Student Current Year

Modified the utility logic so that when a student has an active CTE Program Services descriptor and transfers to another campus within the district, the active CTE Program Service will transfer to the new campus if they offer the services.

Registration > Utilities > Transfer > Scheduling Transfer

Modified the utility logic to ensure that if a student is being transferred to a new campus, that the CTE Program Service records are transferred along with that student.

Registration > Utilities > Delete a Current Year Student

Modified the program so that when the utility is run for a student, data will delete from SR_STU_CTE_PGM_SVC for the current year.

Registration > Utilities > TReX Export

Updated the following GreenLight naming conventions to TReX Data Standards:

- #####LastName_FirstName_descriptor
- ##### = last 4 digits of the Student ID
- LastName = student's last name
- FirstName = student's first name
- Descriptor = stu (student record)
